

OTTO MEETING LARGE / design Christophe Pillet
289ML

mara

DESCRIPTION / DESCRIZIONE

en The Otto collection, designed by Christophe Pillet, is born from an idea of clearness and essentiality: an immediate table that evidently expresses its function. The structure, defined by a double "T-shape" creates a strong and recognizable graphic signature. The metal leg, crafted with the precision of 3D laser cutting and available with upholstery too, yields a solid and architectural character, highlighting Mara's patented height adjustment mechanism. The thick cantilevered tops introduce a controlled lightness. Conceived for both the office and the home, Otto responds to the needs of a new generation with a clear, tactile, and contemporary design language. Otto Meeting Large is a large meeting table featuring a double powder-coated metal base, available in a wide range of colours and finishes to offer extensive customisation possibilities.

it La collezione Otto, firmata da Christophe Pillet, nasce da un'idea di chiarezza ed essenzialità: un tavolo immediato che esprime in modo evidente la propria funzione. La struttura, definita da una doppia "forma a T", crea un segno grafico forte e riconoscibile. La gamba in metallo, realizzata con la precisione del taglio laser 3D e disponibile anche rivestita, in pelle o in tessuto, conferisce solidità e carattere architettonico, valorizzando il sistema meccanico di regolazione dell'altezza brevettato. I piani a sbalzo, dallo spessore importante, introducono una leggerezza controllata. Pensato per l'ufficio e per la casa, Otto risponde alle esigenze di una nuova generazione con un linguaggio progettuale chiaro, materico e contemporaneo. Otto Meeting Large è un grande tavolo riunioni con doppia base in metallo verniciato, proposto in numerose varianti di colore e finitura per offrire un'elevata possibilità di personalizzazione.

- > Otto Meeting Large has a height range of 450 mm.
- > Excluding the table tops it has a minimum height of 700 mm and a maximum of 1150 mm.
- > Otto Meeting Large can be used with table tops from 2600 mm to 3000 mm wide and from 1200 mm to 1400 mm deep.
- > The table frame (2000x650 mm) is designed for optimal operation in a range of weights (top weight + accessories weight) between 57 and 65 kg.
- > Depending on the intended use of the table, carefully evaluate the weight of the table top to be assembled.
- > If a lighter table top is to be installed or if the table is to work without additional weight, the “counter-balance kit” is able to reduce 14,4 kg the upwards thrust allowing a correct functioning of the movement.

Meeting Large	min	max
height range (mm)	460	
frame height (mm)	700	1150
table top width (mm)	2600	3000
table top depth (mm)	1200	1400
table top weight + accessories recommended weight (kg)	57	65
counter-balance kit * (kg)	1,2	14,4

* optional

TOP WEIGHTS					TOP + RECOMMANDABLE LOADING WEIGHT (kg)

PLEASE NOTE: OBSERVE THE WEIGHTS INDICATED

> A load, on the frame, exceeding the maximum weight indicated (top weight + accessories weight), causes a rapid lowering of the table top when unlocked.

> A load, on the frame, below the minimum weight indicated (top weight + accessories weight), causes an excessive upward thrust of the table when unlocked.

INSTRUCTIONS FOR CORRECT USE

FIRST USE:

A. Remove the safety-spacer from the adjustment handle (9a).

ONLY IF NECESSARY:

A. Unscrew the nut (11b) and adjust the handle cable (11c): a clockwise rotation will loosen it, while a counter clockwise rotation will tighten it out. The adjustment is correct when the handle is neither loose nor hard.

B. Secure the nut (11b) after adjusting the cable tension of the handle (11c).

DAILY USE:

1. Place one hand on the adjustment handle and the other hand on the same side of the table top, and operate the movement (fig. 1).
2. Using both hands, lift or lower the top to the desired height.
3. The table is easily adjustable.
In case of difficult use, adjust the handles cable (see "only if necessary").
4. Once the desired height has been reached, stop the movement and release the handle.
The table will automatically lock in the desired position.

ATTENTION

Any part of all components already assembled and supplied by the company cannot be disassembled unless this is done by Mara personnel. The assembly and disassembly of this table must be carried out by skilled operator following the instructions carefully.

- > Otto Meeting Large ha un'escursione in altezza di 450 mm.
- > Escluso il piano ha un'altezza minima di 700 mm e una massima di 1150 mm
- > Otto Meeting Large può montare piani da 2600 mm a 3000 mm di larghezza e da 1200 mm a 1400 mm di profondità.
- > Il telaio del tavolo (2000x650 mm) è progettato per un funzionamento ottimale in un intervallo di pesi (peso piano + pesi accessori) compresi tra i 57 e i 65 kg.
- > In base all'utilizzo previsto del tavolo, valutare attentamente il peso del piano da montare.
- > Se è previsto il montaggio di un piano più leggero o non è previsto di caricare il piano di lavoro, l'accessorio "counter-balance kit" è in grado di ridurre fino a 14,4 kg la spinta verso l'alto permettendo il corretto funzionamento del movimento.

Meeting Large	min	max

ATTENZIONE: ATTENERSI AI PESI INDICATI

> Un carico sopra il telaio superiore al peso massimo indicato (peso piano + peso accessori) causa un veloce abbassamento del piano al momento dello sblocco.

> Un carico sopra il telaio inferiore al peso minimo indicato (peso piano + peso accessori) causa un veloce innalzamento del piano al momento dello sblocco.

ISTRUZIONI D'USO

AL PRIMO UTILIZZO:

A. Rimuovere il distanziale di sicurezza inserito nella maniglia di regolazione (11a).

SOLO SE NECESSARIO:

A. Svitare il dado (11b) e regolare il cavo della maniglia (11c): una rotazione oraria lo allenterà mentre una rotazione antioraria lo tenderà. La regolazione è corretta quando la maniglia non risulta nè libera ne troppo dura.

B. Fissare il dado (11b) una volta regolata la tensione del cavo (11c).

USO QUOTIDIANO:

1. Posizionare la mano d'utilizzo sulla maniglia di regolazione e l'altra mano sullo stesso lato del piano e azionare il movimento (fig. 1).
2. Utilizzando entrambe le mani, sollevare o abbassare il piano all'altezza desiderata.
3. Il tavolo si regola facilmente.
In caso di difficoltà nell'utilizzo, migliorare la regolazione del cavo della maniglia (vedi "solo se necessario").
4. Raggiunta l'altezza desiderata fermare il movimento e rilasciare la maniglia di regolazione.
Il tavolo si bloccherà automaticamente nella posizione desiderata.

ATTENZIONE

Ogni componente fornito già montato dall'azienda non può essere smontato in nessuna sua parte se non da personale Mara. Montaggio e smontaggio di questo tavolo deve essere effettuato da personale esperto seguendo attentamente le istruzioni.

CLEANING AND MAINTENANCE / PULIZIA E MANUTENZIONE

STEEL / ACCIAIO

en Our types of metals include: chromed metals and painted metals. Do not use acid or alkaline based cleaning products. Do not use detergents, steel wool, dishwashing detergents or the like. Sharp or pointed objects may damage the surface. Any hot or wet object may cause surface damage. Clean the surface regularly with a soft cloth to remove dust. To remove light dirt, use a soft cloth and a neutral household cleaner.

it Le nostre tipologie di metallo comprendono: metalli cromati e metalli verniciati. Non utilizzare prodotti per la pulizia a base acida o alcalina. Non utilizzare detergenti, lana di acciaio, detersivi per stoviglie o simili. Oggetti appuntiti o taglienti possono danneggiare la superficie. Qualsiasi oggetto caldo o bagnato potrebbe provocare danni alla superficie. Pulire la superficie regolarmente con un panno soffice per rimuovere la polvere. Per rimuovere lo sporco leggero utilizzare un panno soffice e un prodotto per le pulizie di casa neutro.

CHROMED STEEL AND ALUMINIUM POLISHED / ACCIAIO CROMATO E ALLUMINIO LUCIDO

en Do not use acid or alkaline based cleaning products. Do not use detergents, steel wool, dishwashing detergents or the like. Sharp or pointed objects may damage the surface. Any hot or wet object may cause surface damage. Clean the surface regularly with a soft cloth to remove dust. To remove light dirt, use a soft cloth and a neutral household cleaner

it Non utilizzare prodotti per la pulizia a base acida o alcalina. Non utilizzare detergenti, lana di acciaio, detersivi per stoviglie o simili. Oggetti appuntiti o taglienti possono danneggiare la superficie. Qualsiasi oggetto caldo o bagnato potrebbe provocare danni alla superficie. Pulire la superficie regolarmente con un panno soffice per rimuovere la polvere. Per rimuovere lo sporco leggero utilizzare un panno soffice e un prodotto per le pulizie di casa neutro.

LAMINATE AND MELAMINE / LAMINATI E NOBILITATI

en Laminates and melamine products guarantee high performance in terms of resistance to scratches, shocks and abrasions. Keep furniture away from direct sunlight; furniture in direct sunlight may tend to discolour over time. Do not use acid or alkaline based cleaning products. Sharp or pointed objects can damage the surface. Laminate and melamine furniture can be cleaned using a mixture of liquid soap and hot water. Rinse with cold water and dry with a paper towel or damp cloth.

it Laminati e nobilitati garantiscono alte prestazioni di resistenza ai graffi, agli urti e alle abrasioni. Mantenere i mobili lontani dalla luce diretta del sole; i mobili che si trovano alla luce diretta del sole potrebbero tendere a scolorire nel tempo. Non utilizzare prodotti per la pulizia a base acida o alcalina. Oggetti appuntiti o taglienti possono danneggiare la superficie. E' possibile effettuare la pulizia dei mobili in laminato e nobilitato usando una miscela di sapone liquido e acqua calda. Sciacquare con acqua fredda e asciugare con un tovagliolo di carta o un panno umido.

STANDARD FENIX TOPS / PIANI STANDARD IN FENIX

en Cleaning FENIX means cleaning its structure. You can do this with warm water. As FENIX is a strong material, you can also use any household cleaner – even solvents like acetone * if needed. However, to avoid damaging the structure, don't scrub it with abrasive cream, a scouring pad or a hard brush; in the long-term, this might lead to a glossy spot on your matt surface. Instead, you can use a melamine sponge – also known as a magic sponge. As a final step, to avoid anything staying behind in the structure – whether that's dirt or residue from your cleaner – always rinse afterward with warm water and wipe dry with a clean cloth.
* always follow safety instructions

it Pulire FENIX significa pulirne la struttura. Si può farlo, usando acqua tiepida. Poiché FENIX è un materiale resistente, si può utilizzare qualsiasi detergente per la casa, se necessario anche un solvente come l'acetone *. Tuttavia, per evitare di danneggiare la struttura, è consigliabile evitare di strofinarla usando una crema abrasiva, una spugna abrasiva o una spazzola con setole dure; nel tempo, ciò potrebbe portare alla formazione di un'area lucida sulla superficie opaca. Si può piuttosto utilizzare una spugna in melamina, nota anche come spugna magica. Come ultimo passaggio, per evitare la formazione di depositi nella struttura, che si tratti di sporco o residui del detergente, risciacquare sempre con acqua tiepida e asciugare con un panno pulito.
* seguire sempre le istruzioni di sicurezza.

ACOUSTIC PANEL PANNELLO FONOASSORBENTE

FP120x44 - FP180x44

mara

DESCRIPTION / DESCRIZIONE

en The sound-absorbing panel made with Snowsound technology is an excellent solution for dividing worktops by creating a visual barrier and optimising acoustic comfort. Application to the surface using special clamps.

The panel has an Italian Class1 fire reaction and Euroclass B-s2, d0. The panel is 100% recyclable and has no detectable formaldehyde content according to UNI EN 717-2.

The panel has been tested in reverberation chamber according to UNI EN ISO 354 and obtained "Acoustic Absorption Class A", in accordance with UNI EN ISO 11654.

it Il pannello fonoassorbente realizzato con la tecnologia Snowsound è un'ottima soluzione per suddividere i piani di lavoro creando una barriera visiva ed ottimizzando il comfort acustico. Applicazione al piano mediante appositi morsetti.

Il pannello ha Classe1 Italia di reazione al Fuoco ed Euroclass B-s2, d0. Il pannello è riciclabile al 100% e ha un contenuto di formaldeide non rilevabile secondo la norma UNI EN 717-2.

Il pannello è stato testato in camera riverberante secondo la norma UNI EN ISO 354 ed ha "Classe di Assorbimento Acustico A", in accordo con la norma UNI EN ISO 11654.
